Asian Workers

PASAY CITY · METRO MANILA · PHILIPPINES

Proudly Filipino. Forged on the job.

AsianWorkers.ph is a Pasay City-based IT services company. We started as workers ourselves, so we know how much time manual work steals. Now we build the systems that give that time back to Filipino businesses.

We speak your language

English, Tagalog or Taglish. Whatever is easiest for your team.

One fixed price

Scope, schedule and price in writing before we start.

We stay after launch

Fixes, updates and help on a monthly support plan.

OUR MISSION

"Let machines do the repetitive work, so Filipino workers can do the meaningful work."

We make sure Asian workers are seen, treated fairly and given the tools to build a better future, abroad or at home.

Registered name	**Asianworkers Office Administrative Services**
DTI Business Name No.	**8543323**
BIR registration	**Registered · RDO 051 Pasay City**
Office	**536 Road 3, Pildera II, Brgy. 193, Pasay City 1300**

Your team's time goes to work a system could do.

These are the four time drains we see most in growing Philippine businesses.

Now: Excel + notebooks

Customers and leads get lost

Records sit in separate files and phones. Nobody knows who called whom last, or which follow-up is overdue.

Fix: one CRM with full customer history and a follow-up list for today.

Now: Messenger, one by one

"Ano na po update?"

Staff spend the day answering the same status and price questions instead of selling or serving.

Fix: automatic updates by SMS, email or Messenger, plus a chatbot for common questions.

Now: copy-paste

Same data, typed three times

Orders go from chat to spreadsheet to invoice by hand, and every copy is a chance for a mistake.

Fix: forms that save straight into your system and invoices that create themselves.

Now: guesswork

No numbers for the owner

Sales, stock and collections come together only at month-end, if at all.

Fix: an owner dashboard with today's numbers and a daily summary in your inbox.

1 free hour

Not sure where your time goes? In a free 1-hour call, we map where your business loses time and estimate the cost. You keep the list, whether or not you work with us.

Four services. Each one around how you work.

Systems & CRM

One app built for how your company works.

For teams of 5 to 50 with customers, orders and payments in many places.

- CRM and full customer history
- Orders, schedules and field teams
- Inventory, purchase orders, invoices
- Bookings and registrations
- Owner dashboard with today's numbers

TIMELINE
First working module in about 2 weeks

Automation

Repetitive work that does itself.

For teams copying data from email to spreadsheet to invoice every week.

- Invoices and payment reminders
- Weekly reports sent to your email
- Quotes generated from a form
- SMS, email and Messenger alerts
- Excel, Google Sheets, GCash, accounting

TIMELINE
Results in about 2 weeks

Websites

A website connected to your system.

For businesses whose website is only a business card and whose inquiries get lost.

- Company website and landing pages
- Forms that go straight into your CRM
- Your own content panel
- Speed and technical SEO
- English and Tagalog versions

TIMELINE
A simple website in about a week

Mobile apps

An app your customers or field team carry.

For businesses that need ordering, booking or field work on the phone.

- Android-first, built for PH phones
- Customer accounts and notifications
- Works with your system and CRM
- Taglish-friendly interface
- Admin panel for your staff

TIMELINE
Built in stages, reviewed every 2 weeks

IN DAILY USE

Ardy CRM

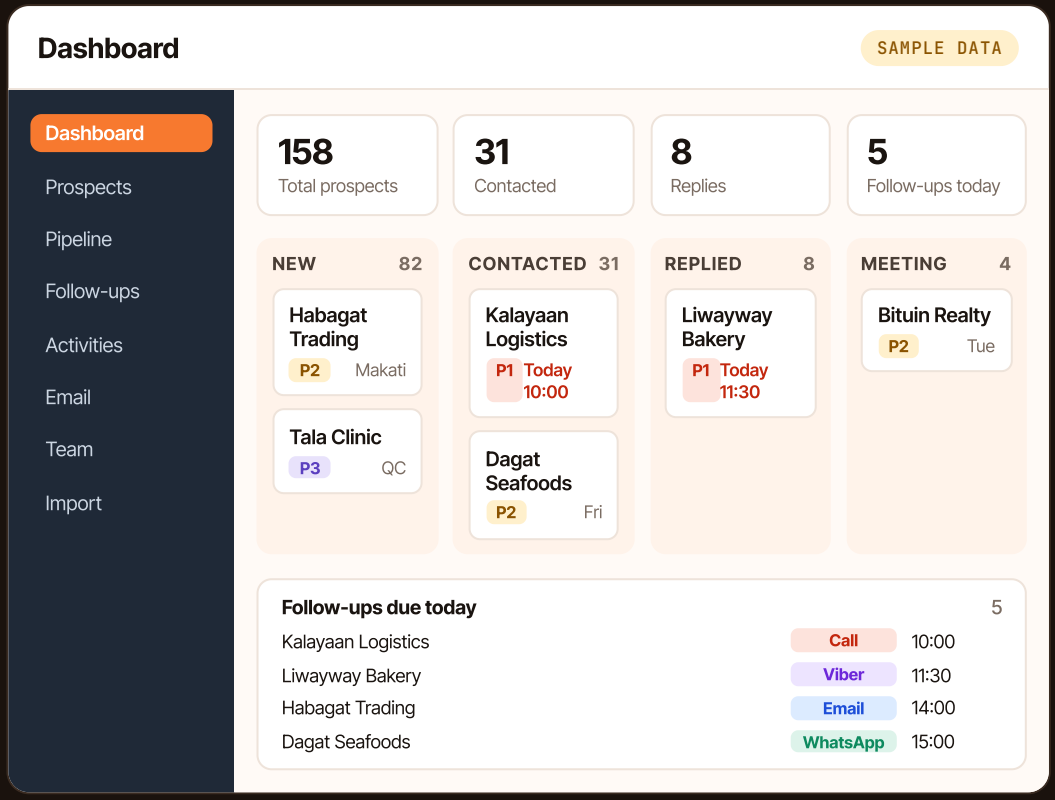

Our own sales and prospecting CRM. It's the base we customize for clients.

THE PROBLEM

Leads were tracked in spreadsheets and chat threads. Follow-ups were missed and nobody could see the full team's activity.

WHAT WE BUILT

- Pipeline with drag-and-drop stages
- Follow-ups by call, email, WhatsApp and Viber, sorted by overdue and today
- Activity timeline for every company
- Email templates, campaigns and reply tracking
- Excel / CSV import and team stats per person
- Admin and sales roles enforced by the database

CRM dashboard and pipeline. Company names are sample data.

CONFIDENTIAL · LAUNCHING IN EUROPE

Job marketplace platform

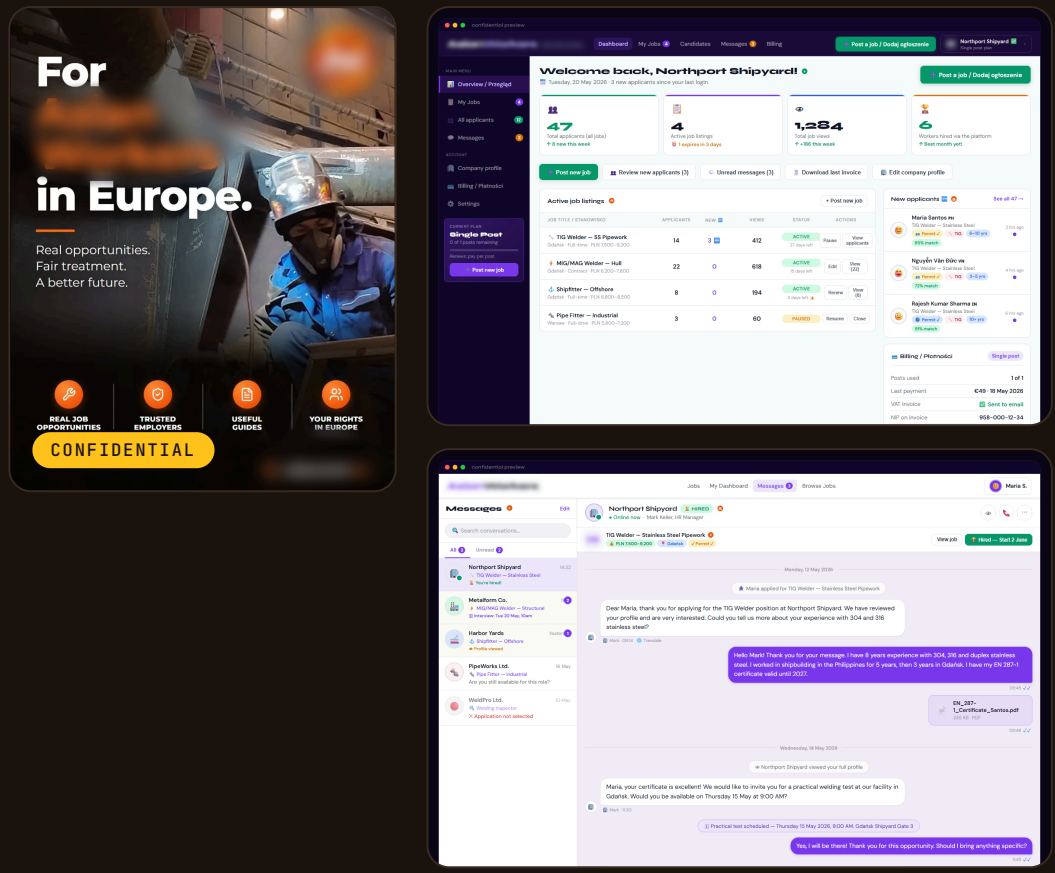

A two-sided hiring platform that connects workers with verified employers, from job search to hire. Name and launch details stay private until release.

THE CHALLENGE

Job seekers relied on social media groups with no employer checks and no clear salaries, while employers paid high fees to find the right people.

WHAT WE BUILT

- Job listings with search and smart filters
- Employer dashboard with an applicant pipeline
- Real-time chat linked to each application
- Company verification before employers can post
- Private document storage for CVs and certificates
- Online payments, plans and invoices for employers

Campaign visual, employer dashboard and chat. Brand names are hidden and screens show sample data.

Marketplace | Web app | Real-time chat | Payments

IN DEVELOPMENT

NAYUMI

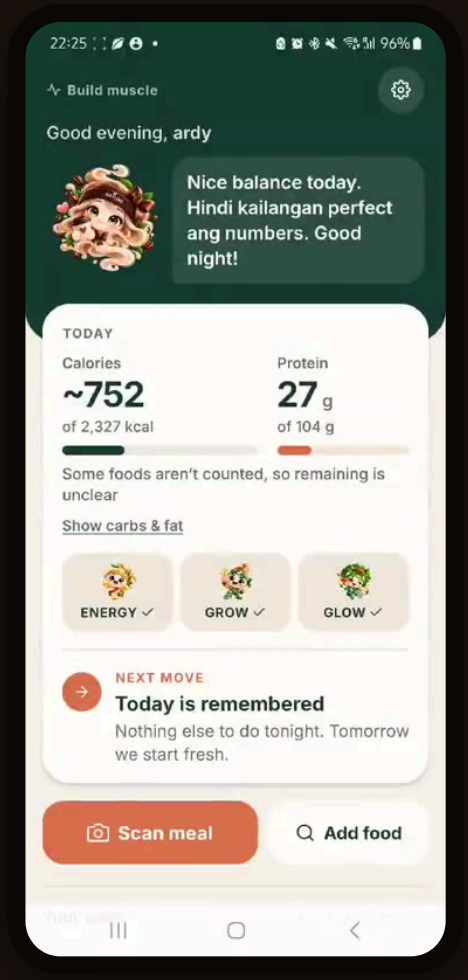

An AI food companion built for Asian everyday life.

THE PROBLEM

Most food and fitness apps are built around Western meals and strict numbers, so they don't fit how Filipinos and other Asians actually eat.

WHAT WE BUILT

- Scan a meal with the camera or add food by name
- Coffee and the Food Friends notice meals and remember habits
- One simple "next move" instead of a wall of numbers
- Daily calories and protein with a friendly tone
- English or light Taglish messages

Coffee, the NAYUMI companion. Left: the real app home screen.

Mobile app · AI · Health · Taglish

PROTOTYPE

PUNDO

A Filipino financial companion for workers at home and abroad. "Save. Send. Grow."

THE PROBLEM

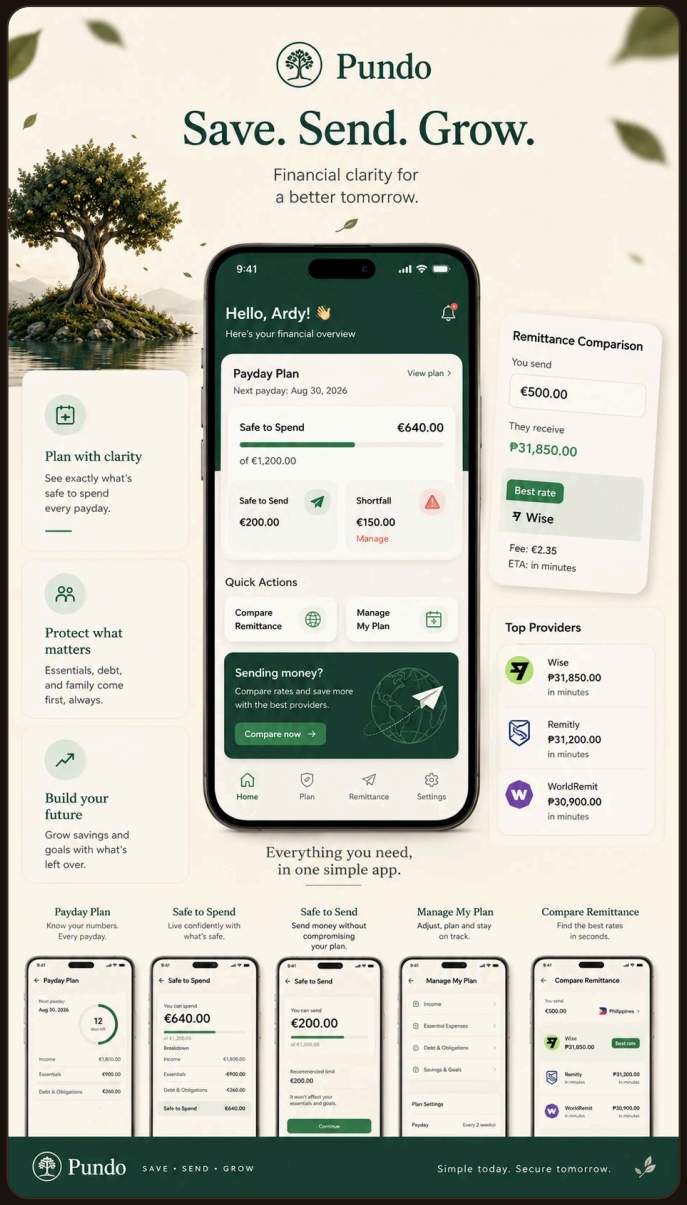

Many workers and OFWs reach the end of the month with nothing saved, even after years of steady work, and lose money on remittance fees.

WHAT WE BUILT

- Payday Plan: see exactly what's safe to spend every payday
- Safe to Send: send money home without breaking your budget
- Essentials, debt and family needs protected first
- Remittance comparison across providers like Wise, Remitly and WorldRemit
- Savings goals that grow with what's left over

WHAT IT SHOWS WE CAN DO

Money-handling logic, clear dashboards for non-technical users, and design for an OFW audience.

Left: PUNDO app overview with Payday Plan, Safe to Send and remittance comparison. Above: PUNDO key art.

Web app | Finance | Remittance | OFW

What we can build for your industry.

Sample use cases. Every system is shaped around your own process after the free call.

Retail & distributors

Orders from Messenger into one list, stock counts with low-stock alerts, and collections tracking.

Systems · Automation

Clinics & wellness

Online appointments with SMS reminders, patient records and daily schedules for each doctor.

Systems · Website

Recruitment agencies

Applicant pipeline, document checklist with expiry reminders, and automatic status updates.

Systems · Automation

Logistics & delivery

Dispatch board for riders and drivers, proof of delivery photos, and COD remittance tracking.

Systems · Mobile app

Restaurants & food

Online ordering, kitchen order display, inventory of ingredients, and daily sales summary.

Website · Automation

Real estate

Lead capture from listings and ads, agent follow-ups, and payment schedules for buyers.

CRM · Website

Schools & training

Online enrollment, tuition payment reminders, and class lists and attendance for teachers.

Systems · Automation

Construction & services

Quotes from a form, job schedules for field teams, and progress photos sent to clients.

Systems · Mobile app

Four stages. Predictable timing.

Stage 1

Free call

One hour on how your work runs today and where time gets lost.

`Free · 1 hour`

YOU GET

A list of time drains with an estimated cost.

Stage 2

Plan & quote

Scope, schedule and a fixed price, all in writing.

`Within 5 days`

YOU GET

A written proposal with a fixed price.

Stage 3

Build in stages

First working module after two weeks. You review it every two weeks.

`4 to 10 weeks`

YOU GET

Working software you can test early.

Stage 4

Launch & support

Team training, data migration, hosting and ongoing support.

`Monthly plan`

YOU GET

A trained team and help when you need it.

INCLUDED IN EVERY PROJECT

Written scope

What we build, when, and for how much, signed before work starts.

Reviews every 2 weeks

You see working software early and steer it as we go.

Training for your team

In English, Tagalog or Taglish, until everyone is comfortable.

Your data, your system

Data migration from your Excel files, plus backups.

Priced for your project. Fixed before we start.

We don't sell packages, so we don't use a price list. Every project gets one fixed price in writing after the free call, based on what your business actually needs.

OPTION 1

Fixed project

One price, agreed upfront

Best for a website, one automation or a clearly defined system. Scope, schedule and price are written down before we start.

MOST FLEXIBLE

Build in stages

Start small, add modules

Best for growing businesses. Start with the one module that saves the most time, then add more when you're ready. Each stage has its own fixed price.

AFTER LAUNCH

Monthly support

Hosting, fixes, updates

Keep your system running and improving. The plan is sized to your system, so you only pay for the support you need.

WHAT SETS THE PRICE

How many features

Pages, modules, screens and user roles.

Connections

GCash, Maya, SMS, email, Sheets or accounting tools.

Your data

How much we move over from Excel or older systems.

Platform

Website, web system, mobile app, or a mix.

Fixed price

Scope, schedule and price in writing. ₱0 hidden fees.

We stay after launch

Fixes, updates and help when you need it, on a monthly plan.

Built for PH tools

GCash, Maya, Messenger, Viber, Google Sheets, Excel.

Your data stays yours

Role-based access, backups, and setups that support the Data Privacy Act of 2012.

One hour call.
No commitment.

Tell us which task eats your team's time. After the call, you get a list of where your business loses time and an estimate of the cost. It's yours to keep.
